

Artist Canvas | 18 mil 100% Cotton Duck Canvas

Artist Canvas is a traditional all cotton gicleé canvas that has all of the warmth, character and individuality a canvas constructed entirely of all natural cotton should have. Its premium coated matte-textured surface makes Artist Canvas the optimal choice for a variety of art gicleé applications where the artist insists on the texture, feel and body only an all cotton canvas can provide. As with any product constructed entirely of all natural materials, the canvas found beneath the gesso of each individual roll has it's own unique tint and hue, reflective of the area it was grown in, making each gicleé a uniquely individual print. Optimized for dye based inks, this canvas is perfect for the traditionalist who demands modern technical excellence in concert with the ambience that can only come from the bounty of nature.

Specifications

Caliper (Mils)	18.3			Dye based only
Gloss (Percent)	3.8			

Application Suggestions

Fine Art; Art Reproductions; Murals

Imaging Guidelines

Printing: Artist Canvas can be used on a wide variety of printers primarily with dye-based inks. Although pigmented inks may be used, absent color adjustment, a minor color gamut difference may occur.

Media Handling: Media should be allowed to acclimate for 48 hours in the printing environment before use. The use of cotton gloves when handling may prevent transfer of oil and dirt to the print surface, which could affect print quality.

Storage/Printing Environment: It is recommended to store and print on this media in a controlled environment, at a temperature between 50 - 85° F and a relative humidity between 30 - 65 percent. Always place in plastic sleeve when not in use. Never let roll lay flat on its side for extended period as damage could occur, store standing on end or suspended in box with end caps.

Finishing Recommendations

Lamination: This media is compatible with spray lamination such as our ProTect lamination spray.

Shipping/Delivery: When preparing a piece to transport, roll the laminated image print side out as LOOSE as possible.
