

WF Poly Pro Matte | 8 mil Waterfast Matte Polypropylene

A water resistant, durable low cost polypropylene film with a non-glare finish.

Specifications

Basis Weight (Total)	140g/m ²	Opacity (%)	92	Ink Compatibility Dye based and pigmented inks
Caliper (Mils)	8.3	Whiteness	100	
Gloss	2			

Imaging Guidelines

Printing: WF Poly Pro Matte can be used on a wide variety of printers with both dye-based and pigmented inks. Compatible with most Grand Format printers.

Media Handling: Media should be allowed to acclimate for 48 hours in the printing environment before use. The use of cotton gloves when handling may prevent transfer of oil and dirt to the print surface, which could affect print quality.

Storage/Printing Environment: It is recommended to store and print on this media in a controlled environment at a temperature between 50 - 85° F and a relative humidity between 30 - 65 percent.

Water-Resistance: Pigmented inks are recommended for optimum water resistance, however, dye-based inks can be used. Image should be allowed to cure for 24 hours before exposing to water. It is normal for a small amount of residual ink to run off the image when it is first exposed to water. This does not deem failure.

Finishing Recommendations

Lamination: Only cold lamination recommended for this media.

Mounting: Use a spray adhesive if mounting is required.

Handling: When laminating with a PSA laminate, a curing time of 24 hours is recommended in order to allow the adhesive to achieve optimum strength.

Shipping/Delivery: When preparing a piece to transport, roll the laminated image print side out as **LOOSE** as possible; this will help avoid tunneling.
