

## Silver Reflective | 4 mil Polyester Metallic Film

This durable polyester-based 4 mil silver film is designed to create special effects for the users. This product produces exceptional eye catching images.

### Specifications

<b>Caliper (Mils)</b>	4
<b>Ink Compatibility</b>	Dye based inks only

### Application Suggestions

Silver Reflective Film is ideally suited for special effect display, salon display, fashion design, retail display, trade show display, party decoration, modern art and others. This product is coated to work with most Dye inkjet printers in the market today.

### Imaging Guidelines

**Printing:** Silver Reflective Film can be used on a wide variety of printers primarily with dye-based inks. Pigment based ink might cause reticulation or bleeding. Allow printed material 24 hours to dry before applying lamination.

**Media Handling:** Media should be allowed to acclimate for 24 hours in the printing environment before use. Material should be handled with white fabric gloves to prevent finger markings.

**Storage/Printing Environment:** It is recommended to store and print on this media in a controlled environment at a temperature between 50 - 85° F and a relative humidity between 30 - 65 percent.

### Finishing Recommendations

**Laminating:** For added surface protection against dirt and abrasion, a pressure sensitive laminate or liquid laminate can be applied to the product. When laminating with a thicker laminate, either mounting onto a board or encapsulating the image, it is recommended to overlap the image with at least 0.25-0.50" of safe edge. This will properly seal the image print to prevent moisture and delamination.

**Mounting:** Standard, cold, pressure sensitive mounting adhesive is recommended to provide the best bond.

**Shipping/Delivery:** When preparing a piece to transport, roll the laminated image print side out as LOOSE as possible.
